NOW THEREFORE the following policy on the levying of property tax is adopted.

SECTION A

1. INTRODUCTION

The Local Government: Municipal Property Rates Act (2004) requires Municipalities to develop and adopt rates policies in consistent with the Act on the levying of rates on rateable property in the municipality. All inputs or representations received on the draft policy of Emfuleni Local Municipality where considered in drafting the final policy.

The municipality needs a reliable source of revenue to provide basic services and perform its functions. Property rates are the most important source of general revenue for the municipality. Revenue from property rates is used to fund services that benefit the community as a whole as opposed to individual households. These include for example installing

and maintaining streets, roads, sidewalks, lighting, and storm drainage facilities; and building and operating clinics, parks, recreational facilities and cemeteries. Property rates revenue is also used to fund municipal administration, such as computer equipment and stationery, and costs of governance, such as council and community meetings, which facilitate community participation on issues of Integrated Development Plans (IDPs) and municipal budgets.

Municipal property rates are set, collected, and used locally. Revenue from property rates is spent within a municipality, where the citizens and voters have a voice in decisions on how the revenue is spent as part of the Integrated Development Plans (IDPs) and budget processes, which a municipality invites communities to input prior municipal council adoption of the budget.

2. OBJECTIVE

In developing and adopting this rates policy, the Council has sought to give effect to the sentiments expressed in the preamble of the Property Rates Act, namely that:

- The Constitution enjoins local government to be developmental in nature, in addressing the service delivery priorities of our country and promoting the economic and financial viability of our municipalities;
- There is a need to provide local government with access to a sufficient and buoyant source of revenue necessary to fulfill its developmental responsibilities;
- Revenues derived from property rates represent a critical source of income for municipalities to achieve their constitutional objectives, especially in areas neglected in the past because of racially discriminatory legislation and practices; and

- It is essential that municipalities exercise their power to impose rates within a statutory framework which enhances certainty, uniformity and simplicity across the nation and which takes account of historical imbalances and the burden of rates on the poor.
- In applying its rates policy, the Council shall adhere to all the requirements of the Act including any regulations promulgated in terms of the Act.

The objective of this policy is also to ensure that:

- All persons liable for property rates are treated fairly, equitably and reasonably;
- Rates are levied in accordance with the market value of the property;
- That rate will be based on the value of all rateable property and the amount required by the municipality to fulfill its developmental responsibility as well as to balance the operational budget, taking into account the surplus obtained from the trading and economical services and the amounts required to cover the costs of exemptions, reductions and rebates which the Council approves from time to time;
- Income from rates will be used to finance community and subsidized services and not trading or economical services and
- To optimally safeguard the income base of the municipality through exemptions, reductions and rebates which are reasonable and affordable.
